General Stripping Applications				✓
Lower Cost Stripping Pad Solution				✓

Floor Stripping Pads

FAQ

Why is there a need for The Beast™ Extreme Stripping Pad?

Today's newest generation of floor finishes are designed to be very hard and withstand regular burnishing. The Beast™ Extreme Stripping pad cuts through multiple layers of burnished finish in a single pass, saving time and labor.

Aren't all stripping pads formulated to be chemical resistant?

Technically yes, all stripping pads are designed to resist adverse effects from common stripping chemicals. As finishes became harder, stronger solvents were developed. The Beast™ Extreme Stripping pad is resistant to harsh stripping chemicals.

With so many choices of heavy-duty stripping pads, is the standard Black Strip pad becoming obsolete?

Absolutely not! The Black Stripping pad is great for everyday stripping applications. It offers excellent results at an economical cost.

What is the average life expectancy of stripping pads?

Through extensive testing, the average stripping pad should last up to 50,000 sq. ft. with normal use. Pad life is directly impacted by application and proper use and care. Always clean pads after each use.

	THE BEAST™ Extreme Stripping Pad Most Aggressive Specially designed for the toughest stripping projects.
	Eliminator Max Burgundy Strip More Aggressive Ideal for heavy-duty stripping tasks.
	Quick Strip Heavy-Duty Stripping Pad Aggressive Formulated with a heavy coating of abrasives making it ideal for removing burnished finishes.
