

Grill-Brick

PRODUCT SPECIFICATIONS

1.0 Description

This grill brick is made of nonporous pumice stone. This item works miraculously to clean griddles and grills while providing optimal results without scratching the surface. The Grill-Brick will disintegrate with use and won't lift the cure, nor clog with grease. It is mainly used in food service applications in restaurants, cafeterias, cafes, schools, churches, homes, etc.

2.0 Properties

Property	Value
Material	Black brick, made of Pumice Stone (Cellular Glass)
Weight	228.7 grams
Pack	12 per case*

* Individually wrapped

3.0 Use

Made for tough cleaning jobs including grease, carbon buildups, water and acid stains, paint, lime, rust and unwanted deposits on hard surfaces. This product is commonly used to remove grease and residue from griddles and grills commonly used in food service applications. The stone-like material is reusable and wears down to a new surface after every use.

4.0 Construction

This product is made of nonporous pumice and will disintegrate with use.

5.0 Labeling

Labeling is to clearly identify product, size, and quantity. Americo brand and private label is available for this product.

6.0 Directions for use

For optimal cleaning results use with water or oil. First wet the brick, and then slide it back and forth on the surface you wish to clean. The paste buildup helps to clean and polish the surface without scratching. Wash the residue from the cleaned surface. The Grill-Brick is safe for hands and is non-toxic.

7.0 Product Care

Clean the brick by rinsing with water and store in a dry storage area.
