Americo Introduces New Diamond Screens

NOW AVAILABLE from Americo – DiaMEND™ Floor Restoration System

ACWORTH, GA, October 2, 2017 – Americo announces the introduction of a new floor restoration system, DiaMEND. The DiaMEND system employs proprietary electroplated technology and restores heavily damaged polished concrete, natural stone and terrazzo floors to like new condition, without the use of special equipment. Americo showcased the new screens, available in 220, 400 and 600 grit, during ISSA's 2017 conference in September. Compared to other diamond restoration systems, the DiaMEND system lasts up to three times longer and provides equal performance vs the competition.

“Americo has a long history of high quality in product design and performance. The company's product line expansion provides solutions for many and continues our strategy of delivering exceptional products to clients in over 70 countries worldwide,” said John Miller, Executive VP of Sales and Marketing.

The new products are currently available and additional details may be found at www.AmericoMfg.com or by downloading the company's mobile app for Android and Apple users.
